

RGS – IBG Annual International Conference 2010
1 – 3 September 2010
Royal Geographical Society
London

GIS for Environmental Modelling

This session aims to bring together researchers to report on state of the art environmental modelling applications. This session seeks to attract papers reporting GIS modelling applications for environmental sciences, in particular, but not limited to those focusing on:

- Sediment transport.
- Improved hydrological network extraction.
- Hydrograph simulation modelling.
- Flood inundation modelling.
- Snow and ice melt modelling.
- Climatic downscaling.
- Large scale temporal and spatial studies.
- Error and uncertainty modelling.
- Geomorphometry.

Convener:

Dr Katherine Arrell k.arrell@leeds.ac.uk

Details of **online submission** can be found at:

<http://www.rgs.org/AC2010>

Important Dates

Deadline for abstracts: **5 February 2010**

Notification of Acceptance: **26 February 2010**

For any questions related to this session, please contact the convener.
